CAPABILITY STATEMENT

NCAGE: 99X7H | DUNS: 850-929-425

MAIN CAPABILITIES

Atlantic Contract vendors deal among other projects with the construction of permanent and mobile military training grounds.

We offer short-term and long-term rental of tent halls/CHUs in Poland and all over Europe.

We specialize in renting sanitary, office and storage containers with equipment/power supply and services (laundry/fuel/sanitary).

Our employees have gained the necessary experience in building temporary roads, parking lots made of concrete or rubber slabs, appropriate for a given location and demand.

WHO WE ARE:

Atlantic Contract was established to address a specific need in providing expertise in marketing to government and civil agencies. Presently, we boast a roster of over **150 local vendors** prepared to support your missions in the European Command (**EUCOM**) region. Originally stemming from a law firm, coupled with executive-level Business-to-Government (B2G) marketing and management expertise, Atlantic's team has expanded to include twenty-one professionals operating within the EUCOM region alongside local vendors.

As a business incorporated in **Poland**, with a presence extending across **Europe and Ukraine**, Atlantic Contract was founded and is overseen by a former US Army Corps of Engineers Quality Control Construction Manager, whose track record includes successfully executing over 100 awards. Our core competencies lie in serving as a **general/sub contractor and business integrator**, specializing in groundworks, Life Support Area (LSA) construction, installation of berry and non-berry tents, Maintenance, Repair, and Operations (MRO) projects, as well as gravel delivery.

With a global reach focusing on the **Outside Continental United States (OCONUS)** and **EUCOM** government and commercial markets, Atlantic Contract distinguishes itself from competitors through exceptional speed, competitive pricing, and a military-style approach to execution.

Our methodology involves meticulous attention to detail: firstly, by obtaining comprehensive requirements and potentially recommending more suitable solutions; secondly, our research and business development teams source and negotiate effectively; and finally, our field teams execute project management with stringent Quality Assurance (QA) measures to ensure deliverables are in strict compliance with requirements.
